Note: See appendix A for an explanation of terms used.

[1] Represents expenditures during the year for both new and used plant and equipment.
figures for cost of minerals received for preparation are included with those for cost of supplies, purchases for resale, and purchased fuels and electric energy.
[2] Figures for primary services performed in other industries are included with those for primary services by establishments classified in the specified industry.
[3] Excludes figures for minerals produced and used in the same establishment.
[4] Figures for the value of shipments of primary products by establishments classified in other industries are included with those for the value of shipments of primary products by establishments classified in the specified industry. See also footnote 7.
[5] Includes figures for minerals produced and used in the same establishment in making manufactured products. The value of such products was estimated.

[1] Represents gross shipments of the mineral indicated by the industry names less minerals transferred to other establishments for preparation, or lees minerals received from other establishments for preparation.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing[1] figures for individual companies. (NA) Not available. (X) Not applicable.
[2] •Excludes data for central offices and related facilities.

[2]Not shown since the cost of supplies, purchased fuels and electricity, contract work, and purchased machinery installed exceed capital expenditures.
